Bill of Health
services

FOCUS ON MEDICINE, NOT BUSINESS.

The successful practice of medicine today depends as much on back-office acumen as it does advanced medical expertise. Bill of Health Services, Inc. has earned its reputation as the preferred partner when it comes to medical billing and accounts receivable management.

BILL OF HEALTH SERVICES, INC. WAS ESTABLISHED IN 1984 TO HELP MEDICAL PRACTICES WITH THE CHALLENGE OF BILLING AND CLAIM SUBMISSION. THE COMPANY QUICKLY GREW TO A WELL-RESPECTED CORPORATION KNOWN COAST-TO-COAST.

Bill of Health Services is based in Rockland County and all claims processing is handled in its New City, New York, office. By keeping the work close to home, the company ensures that it is always 100% current with changes in billing codes and, therefore, enjoys a higher rate-of-success for its clients while providing local employment opportunities.

THE BILL OF HEALTH DIFFERENCE

- High level of client communication
- Accurate claim submission
- Payments are reconciled to the penny, ensuring accuracy
- Aging reports generated and reviewed monthly
- Client education and updates
- Chart reviews for clients and on a consultative basis
- Reimbursement analysis
- Monthly educational meetings
- Out-of-network payment negotiation
- Credentialing service for clients
- Electronic document management

The company was founded by Madelon Berger, who holds a Master's Degree in Public Health and a Master's Degree in Psychology. She is also a Certified Coding Specialist- Physician-based (CCS-P), a Certified Professional Coder (CPC), and a Certified Healthcare Billing and Management Executive (CHBME).

THE CHALLENGE MOST MEDICAL PRACTICES FACE TODAY IS THAT THE RULES ARE CONSTANTLY CHANGING.

To help avoid these challenges, Bill of Health Services offers comprehensive billing and accounts receivable management services.

Beginning with accurate coding and claim submission, Bill of Health Services tenaciously works with insurance companies until claims are paid.

In non-participating practice situations—the company aggressively pursues payors to secure the highest level of payment possible, up to 98% of charges.

+ INTEGRITY + TENACITY + EXCEEDING EXPECTATIONS

Bill of Health Services understands that placing billing and accounts receivables in a third-party's hands is a supreme act of trust. The company places a premium on this trust and fiercely protects its clients, ensuring they get paid appropriately.

Never over-promising and with a focus that is unusual in the industry, Bill of Health Services acts as a seamless partner to its clients, proving the value of the relationship on an ongoing basis. The company focuses on client communication and regularly updates clients, providing readable reports to ensure there are no surprises.

The company's culture of communication is not limited to regular client updates. BOHS stays ahead of the pack, learning of health care system changes before they are enacted. The company then educates clients and works with them to update internal processes well before deadlines.

In every instance, working with Bill of Health Services is significantly more cost-effective than handling billing and accounts receivable in-house. Otherwise, clients would require dedicated staffs to submit claims and pursue receivables.

In 1998, Bill of Health Services established its Coding and Compliance Division, overseen by a registered nurse and a team of specially trained coders who all have relevant, specific backgrounds in the medical field. The Division addresses coding, bundling, documentation and compliance issues and keeps clients up-to-date on evolving requirements and changes that need to be made.

WHAT OUR CLIENTS TYPICALLY HAVE TO SAY...

"I have had the pleasure of working with Madelon Berger and her company Bill of Health Services for several years. I have found her and her employees to be highly reliable, dependable and knowledgeable.

My calls and questions have always been answered in a timely fashion. It is a pleasure for me to endorse Bill of Health Services."

"Over the course of our 16 year business relationship, our physician practice continues to rely on Bill of Health, Inc. for all our billing and reporting needs. Bill of Health provides our Department with comprehensive billing services which includes extensive follow up, coding and compliance training, chart auditing services and accounts receivable management which are essential to our operation and financial well being. We have complete confidence in their expertise and their professionalism is second to none."
